TechBridge Sol

Third Part / Vendor Management Policy

Effective Date: January 2026
Applies To: All Operations, IT, and Procurement Staff

1. Purpose

The purpose of this Third-Party / Vendor Management Policy is to define standards and procedures for engaging, monitoring, and managing external vendors and service providers. This ensures that TechBridge Sol maintains **security, compliance, operational reliability, and service quality** when working with third parties.

2. Scope

This policy applies to:

- All vendors providing software, hardware, cloud, or IT services
- Consulting, maintenance, or professional service providers
- SaaS and third-party integrations
- Contractors or temporary staff providing operational support

All employees involved in vendor selection, contracting, or monitoring must comply with this policy.

3. Vendor Selection

- Conduct a **risk assessment** before engaging a vendor, including security, reliability, financial stability, and compliance
- Evaluate vendors based on **service level agreements (SLAs)**, pricing, and past performance
- Obtain approvals from Operations Manager and relevant department heads
- Document all evaluations and decision-making processes

4. Contracting and SLAs

- All vendor engagements must be governed by a written contract specifying:
    - Scope of services
    - Roles and responsibilities
    - Performance expectations and KPIs
    - Security, confidentiality, and compliance requirements
    - Termination clauses and penalties
- Contracts must be reviewed by legal or compliance teams before signing

5. Vendor Monitoring and Performance Management

- Maintain an **approved vendor list** with contact points, contract dates, and service scope
- Regularly monitor vendor performance against SLAs and KPIs
- Document incidents, service disruptions, or breaches of contract
- Conduct quarterly or semi-annual reviews of critical vendors

6. Security and Compliance Requirements

- Vendors must adhere to **TechBridge Sol security policies** and applicable regulations (e.g., GDPR, ISO 27001)
- Ensure secure handling of company data, credentials, and access rights
- Require vendors to provide evidence of security certifications or audits where applicable
- Immediately escalate security or compliance breaches to IT Security and Operations management

7. Risk Management

- Identify potential risks for each vendor engagement: operational, financial, legal, or reputational
- Implement mitigation strategies such as secondary vendors, monitoring, or contractual protections
- Maintain a **vendor risk register** and review regularly

8. Offboarding and Termination

- Ensure proper **revocation of access** to systems, tools, and sensitive data upon contract termination
- Retrieve company-owned assets and documentation from vendors
- Conduct an offboarding review to capture lessons learned and mitigate residual risks

9. Policy Compliance

- Non-compliance may result in operational disruption, security breaches, or legal exposure
- All employees must report vendor issues or non-compliance promptly
- Vendors failing to meet contractual obligations may be terminated or escalated according to contract terms

10. Policy Review and Updates

This Third-Party / Vendor Management Policy will be reviewed annually or when major vendor relationships, technologies, or regulations change. All staff are expected to comply with the latest version.
